6690 COLD FUZE™ POURABLE CRACK SEALANT

6690 ColdFuze™ has provided us the ability to have a scalable crack filling program without using a costly distributor or kettle. We now save time without needing to heat up the kettle, maintain it, and clean it.

The Perma-Patch team has been very helpful in educating us and supplying us with what we need. We have been very impressed with the 6690 ColdFuze™ product so far.

We are able to address many of our own cracks without the costly equipment or being bound to a contractor's schedule.
